### **Mainpine® and Interbit Data Join Forces to Offer Reliable Faxing Solutions for the Healthcare Industry**

*NetFax™, the Leading Fax Solution for MEDITECH® systems, Supports RockForce™ Intelligent Fax Cards —  
Giving Hospitals and Medical Facilities an Industrial Strength Faxing Solution*

PORTLAND, Oregon — April 24, 2006 — Mainpine® Inc., an innovator in the global intelligent fax hardware arena, and Interbit Data®, the leader of secure data access and report distribution products for hospitals, today announced NetFax software and the NetFax EM series of integrated fax appliances support the RockForce™ intelligent fax board product line. The coupling of Mainpine's multi-port fax cards with Interbit Data solutions can help eliminate the problem of unsecured patient information sitting on fax machines by ensuring the report is reliably sent to the appropriate recipient.

The NetSolutions suite integrates with MEDITECH's MAGIC and Client/Server systems to allow healthcare organization employees the ability to direct documents and faxes to users defined within the system. As a result of deploying the integrated NetFax / RockForce solution, MEDITECH customers can expect to save hundreds of hours in processing time and improve quality assurance while supporting HIPAA compliance requirements because confidential and sensitive patient information is managed in a centralized and secure location.

"Mainpine helps us to provide an 'enterprise-class' fax board option for our NetFax customers where performance, reliability and cost are paramount," said Arthur Young, president and CEO at Interbit Data. "As a result of deploying this integrated solution, we are helping healthcare providers connect doctors and staff to the data they need on a daily basis."

"We are delighted to work with Interbit Data's NetFax application as they are the leading fax server solution for MEDITECH environments," said Lloyd Johnson, president and CEO of Mainpine, Inc. "Together NetFax software and Mainpine fax boards can directly impact the quality of patient care, speed the processing of documents, and most critical, and support HIPAA recommendations for patient confidentiality."

#### **About Interbit Data**

Interbit Data offers turnkey solutions for MEDITECH customers in the areas of infrastructure support and secure communications. The NetSolutions products include NetAccess, NetFax, NetPrint, NetPrint Plus, and MPrint. Founded in 1997 by Arthur Young, Interbit Data's cost-effective solutions provide secure and reliable information access and distribution for more than 400 MEDITECH sites. The NetFax product is on the MEDITECH support list and is the recommended fax solution for HCA hospitals. Our MPrint product is part of HCA's best practices in support of On-Line Medication Administration Records. For more information, contact Interbit Data, Inc. at 508-647-0013, [info@interbitdata.com](mailto:info@interbitdata.com), or visit our web site at [www.interbitdata.com](http://www.interbitdata.com).

#### **About Mainpine, Inc.**

For nearly a decade, Mainpine has been an industry innovator in the global fax hardware arena. The company has built a worldwide reputation for its line of reliable, intelligent RockForce™ fax cards that offer an affordable alternative to the traditional expensive fax boards. Along the way the company has introduced a number of innovative technologies, including Intellichannel, that focus on delivering fax communications smarter, faster, and with greater security and reliability than ever. Mainpine's RockForce product line is sold through more than 40 regional, national, and international distributors and is available through hundreds of resellers and integrators worldwide.
